KEYNOTE

Modernizing with a Winning Formula

Chris Crone (Broadcom)

A variation of this keynote that was done at IDUG NA by David Stokes

Behind every successful race is a strong pit crew. Crew members ensure the race car is balanced, operating temperature is set, and all features are enabled for maximum torque. In the world of Db2, the “pit crew” includes Database Administrators, System Engineers, and Application Developers—all working together to support overall business goals in a 24x7 economy. Come on a test drive with the Db2 pit crew to find a formula for success in the race toward modernizing the mainframe experience.<<

Db2 Utilities Update

Tom Crocker (Rocket Software)

Help SLA achievements and satisfy application needs adopting Db2 Profiles

Roberto Cason (BMCSOFTWARE)

Db2 Analytics Accelerator what is new and customer Experiences with sizing, planning, installing, and deploying

Cuneyt Goksu (IBM)

Continuous Delivery - Navigating from Db2 12 to Db2 13

Chris Crone (Broadcom)

Db2 12 was released 7 years ago with 10 Function levels delivered in the interim. Db2 13 is here, with 4 function levels already - What do you need to know to prepare for Db2 13? This session will cover how to prepare for the migration as well as getting to Db2 13 successfully, as well as moving through the Db2 13 functions levels.

What you can and cannot (but could) do with Recover for Db2 for z/OS

Ramón Menéndez (BMCSOFTWARE)

Estrategia sw AI en IBM Z

Diego Cardalliaguet (IBM)

IBM SQL Data Insights

Diego Cardalliaguet (IBM)

OM ODP Dashboards/demo

Tom Crocker y Carlos Guardia (Rocket Software)

Playing (with) FETCH

Chris Crone (Broadcom)

This session will delve into the many ways to get data out of Db2. These vary from SELECT INTO; to SELECT FROM FINAL TABLE; to FETCH FOR :N ROWS; to RESULT SETS. Db2 has evolved over the years and there are many ways to get data from Db2 - this session will be both a primer and a review.

Matarraña, Disaster y factor humano

Eugenio Francés Foz
